Wash: 40

ENGEL SAFETY+ Winter Trousers are designed to provide comfort and protection in cold and demanding working environments. Reinforced knees enhance durability, while the adjustable elasticated waistband ensures a flexible fit. The trousers feature spacious front slant pockets, a concealed two-way zip and access to inner garments for easy adjustment of layered clothing. Snow gaiters inside the legs and a hook-and-loop fastening at the ankle help keep out cold and snow, while reflective details improve visibility. Must be worn together with a suitable upper garment of the same or higher insulation rating for optimum protection against cold conditions.
