Wash:

ENGEL SAFETY+ Winter Trousers are designed to provide protection and comfort in cold working environments. The antistatic inherent fabric provides reliable protection, while an extra-high back panel and adjustable elastic at the waist and waistband ensure an excellent fit. Reinforced knees increase durability, and the concealed button fastening reduces the risk of scratching. The trousers feature two side pockets with hook-and-loop closure, as well as a concealed two-way zip with access to inner garments and trouser pockets. Snow gaiters inside the legs and a hook-and-loop fastening at the ankle help keep out cold and snow, while reflective details improve visibility. Must be worn together with an upper garment with the same or higher insulation rating for optimum protection against cold conditions.

- Antistatic inherent fabric
- Extra-high back panel and adjustable elasticated waist
