Knee Pads

20

Size: One size

Material: 100% E.V.A. (Ethyl Vinyl Acetate)

Wash:

These ergonomically-designed knee pads provide reliable protection and comfort during work that requires prolonged kneeling. The shock-absorbing construction reduces strain on the knees, while the contoured shape follows the natural form of the body for an optimal fit. Designed for flexibility as well as protection, the pads allow freedom of movement without compromising safety. The smooth surface makes them easy to insert into all ENGEL knee pockets and ensures they do not stick to the trousers. With their combination of comfort, durability and ease of use, these knee pads are an essential accessory for reducing pressure and supporting the body throughout the workday.

- Ergonomic design for optimal protection
- Easy to insert
- High comfort, protection and flexibility
- Shock absorbing
